

VERSACLEAN & VERSACARE  
ACCESSORIES

# Versaclean & Versacare Range

The Versaclean and Versacare product ranges open up 101 possibilities within the professional cleaning sector, providing an extensive choice of equipment of all shapes and sizes and functions.

Much of the product range is unique, with key patented features, all designed to result in a true blend between today's technology and our own brand of quality based common sense engineering.

In support of the full Versaclean/Versacare line we provide an exceptional range of accessories allowing innovations and additions to be achieved on an almost unlimited scale.

The success of most cleaning projects is ensuring that

the staff are provided with equipment designed to satisfy the requirements of the particular application almost without compromise. We can all only expect cleaning standards to improve if we, in turn, improve the very equipment and facilities with which those standards must be achieved.

Just think of some of the recent innovations:

**Microfibre technology** – reduced reliance on aggressive chemicals and truly environmentally friendly.

**Automatic water separation** – this really is mopping as it should be, raising efficiency and standards.

**Structurofoam construction** – very much the professional choice, providing long-life and total reliability.

**Colour coding throughout** – allows planning and control to the highest of standards.

All these many developments allow for improved and cost effective cleaning systems.

The Accessory Range is given the same priorities as the equipment itself and will not only allow customizing of equipment in the first instance but also modifications which may be needed in the future due to changing requirements.

Versaclean & Versacare are, in many respects, a management system and, like any good system, full consideration and consultation in the initial instance will ensure that a sound specification is attained. The respect of the staff that must use the equipment is earned and, last but by no means least, it will play its part in improving standards which will be appreciated by all.

**Innovation, design & technology...**  
**Versaclean and Versacare**

# Versaclean & Versacare Accessories & Attachments
