- Easy bag change
- 'L' shaped head for superb edge cleaning
- Ergonomic carrying handle
- Works when flat
- Replaceable brush strips
- HEPA filter

BS 360 / 460

PERFORMANCE YOU CAN RELY ON

No other upright vacuum cleaner has the proven professional pedigree of the SEBO BS range. Used all over the world in every kind of commercial environment the SEBO BS sets the standard for dependable performance. The new BS 360/460 version brings all the benefits of the previous generation, with enhanced filtration and high efficiency.

WORKS WHEN FLAT

Surprisingly few upright vacuum cleaners can clean when they are completely flat, but of course the SEBO BS can, meaning it can get right under beds, etc.

BRUSH OFF WHEN UPRIGHT

When the machine is put into the upright position, the brush motor will automatically turn off and will re-start when the foot pedal is depressed and the handle lowered.

EASY BAG CHANGE

The bags and filters are easily accessible. With their multi-layer design and sealable tops, SEBO bags are hygienic and offer optimum performance.

ELECTRONIC GUIDANCE SYSTEM

An easy to follow green and red light system helps get the best performance – Green only 'Good', Green and Red 'Lower brush' unless it is on level 1 when it means 'Change brush strip', Red only 'Brush jammed'.

REPLACEABLE BRUSH STRIPS

When the electronic monitoring system indicates a new brush strip is required, simply press the button, remove the side plate and slide out the brush strip – Without the use of tools.

EASY UNBLOCKING

The trap door, easy to remove hose and ability to separate the top and bottom of the machine make clearing blockages easy.

L-SHAPED CLEANING HEAD

To reach right to the edge and get under things like radiators and furniture, the SEBO BS features an extension to the cleaning head.

HIGH FILTRATION

A built in HEPA filter gives 'A' rated filtration.
