VersaClean & VersaCare

Cleaning, Care and Control

Wherever one travels in the world, one thing is more than obvious and that being the need and attention being given to the quality of life, care of people and the cleanliness and orderliness of public buildings and facilities.

No longer will we, the public, tolerate low standards of cleaning and hygiene and, as a direct result, improved systems must ensure effective and efficient maintenance to ever rising standards.

The Numatic VersaClean & VersaCare ranges of equipment provide a wide selection of models and designs covering the management

of cleaning, service, movement and care systems providing an exceptional selection of sound, innovative and well engineered modules which will allow staff to attain the very standards that we all expect.

Planning of all maintenance systems must take into account a full range of considerations, many of which will vary from application to application - but without a comprehensive plan, the correct equipment and the right staff, the appropriate standards will not be achieved.

Water/Cleaning Solution Application

629143 -
Microfibre Nylostripe

Spraymop SM40

Kit DTK5 (See pages 28 to 31)

Without doubt one of the most useful floorcare damp mopping accessories for professional use.

The Spraymop has a full 40cm (16") Microfibre mop head with its own integrated 400ml container that is operated by foot or hand in order to apply small amounts of water or cleaning solution to the floor, as required, in order to maintain the dampness of the mop.

The standard cleaning head is to our unique Nylostripe specification. This is a dual-function operational design with the active stripes cleaning the floor surface whilst the deep collection fabric retains the accumulated dirt during use.

By maintaining the dampness of the Microfibre with the spray system, the collection and accumulation of dirt particles is substantially enhanced and will be effective even without the use of added chemicals and detergents.

The universal stainless steel "Z" coupling between the aluminium mop stick and cleaning head provides full 360° articulation, allowing varying movement techniques to suit different areas and applications.

The Nylostripe mop head is easily removed and replaced due to the simple elasticated pocket system - no special fixing.

Simple, Practical and Professional... Never Better.

Detachable solution system is simplicity itself.

Spraymop Master SMM40 Kits DTK6/DTK8

(See pages 28 to 31)

There are an increasing number of applications for spot or maintenance mopping, dedicated to keeping a visually good appearance to floor surfaces in high profile environments.

With the world comprising a vast collection of climates and floor surfaces, the Spraymop Master system has been developed to accept the complete range of our pocket mops; providing a full choice to suit the majority of needs.

★ *A full range of Nylostripe Microfibre and loop mops is available to suit varying applications in different environments and climates. (See page 30)*

Like Spraymop, the Spraymop Master starts with pre-wetting the clean mop before use and simply using the onboard liquid spray system to maintain the level of dampness needed for the specific application. Spraymop and Spraymop Master are not full large area mopping systems. They are floor maintenance accessories, where localised or spot cleaning is essential in maintaining high standards.

Multimop MM30

Super clean floors... twice as fast... not to mention walls or even ceilings. Yes the professional Multimop is one of the simplest, most effective smaller area mopping systems you will ever use but, like all the best ideas, it is the totally thoughtful design concept that makes it so outstanding.

A unique giant 35cm (14") sponge mop that will really out perform the rest. The sponge absorbs more than 10 times its own weight in liquid so you can really put plenty down and pick it all up again and to cap it all, its very operational design makes it virtually self cleaning.

The 30-litre pail runs on 4 twin-wheel castors, so no more lifting buckets all the time - where you and your mop go, the bucket goes with you... on its wheels. This is professional convenience mopping.

Giant 35cm Pads

The giant sponge is a 100% natural cellulose product with exceptional absorbency and is virtually self-cleaning in use. Every time the mop is immersed and squeezed for use a flood of water literally flushes the sponge every time. The Velcro backing allows quick and easy removal.

With the scouring and deep cleaning pads, clean the dirty floor surface aggressively as required by the level of soiling, without collecting the wet residue. As the final operation change to the sponge head, wash with plenty of water and sponge dry as normal - simple and effective.

Hi-Bak HB1812

The 1812 represents a super compact, truly professional dual compartment mopping unit, with our unique parabolic separator allowing a generous 18-litre front clean water container and 12-litre dirty water section to the rear.

The 60%/40% split in container capacity is genuinely practical, allowing larger areas to be cleaned before emptying and refilling is required.

For smaller applications the separator may be reversed and the press placed in its lower mounting position, resulting in a truly Xtra Compact system. In the event of a single 30-litre bucket requirement, the parabolic separator can be easily removed.

The All-Mops Press is suitable for a whole range of Kentucky and Flat mops, providing excellent performance and results.

The Structofoam Hi-Bak bucket design speaks for itself in terms of rugged reliability, running on 75mm (3") non-marking castors - ensuring excellent movement.

DualMop

DM1520/2020/2820

A range of compact, efficient dual bucket mopping systems meeting an exceptionally high standard of performance and functionality. Just look at the features:-

1. A range of 3 sizes: 15-litre, 20-litre and 28-litre.
2. A choice of 2 press heights, hi and lo, for operator convenience.
3. The highly efficient Allmops vertical hi-power press, suitable for both Kentucky and Flat mops.
4. A comprehensive range of 10 mop kits to suit all models.
5. Our unique Bactiguard Kentucky mop head that does not support the spread of bacteria.
6. Our Nylostripe microfibre mop selection provides excellent performance and the choice of chemical free cleaning.

Optional Easy-Fit Swing Pail - OUT

SingleMop SB28W

The SB28W is an exceptionally compact, yet big capacity, single bucket professional mopping system with the very real advantage of a fully integrated onboard, lidded, 30-litre waste unit that can be used with or without waste bags and an additional caddy for the storage of all those necessary cloths, dusters, sprays, etc.

Based on our high profile chassis and running on 75mm (3") non-marking castors, this is a strong, rugged and practical cleaning package.

The All-Mops Press allows use with our full range of Kentucky or Flat mops, ensuring quick and effective performance.

See pages 28 to 33 for full mop selection. * Photographs include extra items for illustration purposes only.

TwinMop TM2815

The Twinmop 2815 is a world first, being a complete compact dual bucket mopping system incorporating our large, oversize, clean water bucket, dirty water pail and using our patented AWS (Automatic Water Separation) system.

AWS is a serious operational advance... it means you only work from the one generous 28-litre clean water bucket below the press, but every time you use the press the water is automatically discharged into the red dirty water pail, providing for quick and easy emptying and refilling.

AWS really does make mopping quicker and better.

The Twinmop system is equipped with the All-Mops Press, allowing use with the full range of Kentucky and Flat mopping systems.

The chassis is our strong high profile construction, running on 75mm (3") non-marking castors, ensuring excellent mobility.

A small caddy is also provided to permit all those essential cloths, sprays, etc to be carried as standard.

TwinMop TM2815W

The Twinmop 2815W has all the advanced features of the standard model but with the addition of an onboard, lidded, 30-litre waste system, full size top caddy and one 5-litre pail... here you have a full, super compact, total cleaning system.

Our patented AWS (Automatic Water Separation) system is not just unique, it is a real advantage in use - allowing you to work only from the one generous 28-litre front bucket, with dirty water automatically diverted to the red pail for emptying as necessary.

The All-Mops Press is exceptionally efficient and allows you to use the complete selection of Kentucky, Flat or Microfibre mops.

Twinmop really does mean quicker and better cleaning... nothing missed, nothing forgotten and long overdue.

VersaClean Systems...

The VersaClean service system has its foundation in the well established and proven Numatic Structofoam construction providing not only innovative designs but to a standard that will work well, year in year out, even in the most arduous of applications.

Throughout the range you will find a selection of systems, styles and sizes that constitute the basis of the individual modules; to which can be added a vast range of accessories and attachments that allow specifications to be achieved to suit the majority of needs.

Take time to consider the various aspects of the task in hand – size, times available, staff requirement and performance standards.

The final selected VersaClean concept will be a balance between a dedicated workstation and mobile management, a place for everything and everything in its place, and when correctly equipped and used, will raise both moral and standards to the benefit of all.

***VersaClean...
Cleaning Management
without Compromise***

Numatic Versa Mop

Versamop Com

The Versamop chassis is a rugged Structofoam concept, but by virtue of its designed simplicity it is able to accept three different cleaning systems as standard.

With additional optional accessories that will literally transform the unit into a comprehensive cleaning module, with onboard waste and storage facilities as required.

Numatic VCN-1804

VersaClean 'All-1'

The VCN-1804 has been developed from the ground up, giving high priority to exceptional mobility, construction integrity and usability, with numerous optional facilities able to be added to extend the scope of the product to meet different requirements.

Construction is based on our well established Structofoam specification; equipped with 200mm (8") heavy duty, super quiet castors, rotary corner protection and soft side-wall protection. Deep base and trays provide plenty of practical storage and room for a choice of cleaning pails with or without lids. The universal waste system is standard, allowing the use of single 120-litre or twin 70-litre waste bags as required.

Numatic VCN- 1904

VersaCare Enclosed

The VersaCare 1904 combines all the very best constructional and design features of the 1804 model but provides the added advantage of an enclosed storage section for reasons of both looks (in high profile areas) and security where necessary.

Construction is based on our well established Structofoam specification; equipped with 200mm (8") heavy duty, super quiet castors, rotary corner protection and soft side-wall protection. Deep base and trays provide plenty of practical storage and room for a choice of

cleaning pails with or without lids. The universal waste system is standard allowing the use of single 120-litre or twin 70-litre waste bags as required.

Enclosed Bag System

4 x 5-Litre pails and 2 x twin bottle holders

Locking Storage

Large Rotating Transit Wheels

VCN1904 basic unit.

Vertical Press Model

Equipped with our full twin 22-litre mopping kit (BK4) which includes generous 22-litre clean and dirty water buckets and the highly efficient Allmops press which incorporates our unique mop absorber feature that substantially improves operating performance. When you select your preferred mop system additional mop heads are available to order as required.

Available as kits
DTK-1, DTK-2 & DTK-3

losed Service Module

Wide Press Model

The flat press mopping kit (BK5) comprises a wide 22-litre red dirty water and rinse bucket and matching 15-litre blue clean water facility. The Speedclean widepress, with its high efficiency mop absorber feature, substantially improves operational performance and is designed to be equally effective with either loop or microfibre mops.

Mop Choice...

The days of a simple mop and bucket as a means of cleaning a floor are long gone. Using more than 30 years of innovation and practical common sense the Numatic VersaClean range of mopping equipment and mop systems provides efficient and effective solutions to the majority of requirements worldwide.

There are different countries, different climates, different techniques, different floors and different staff but, with all these differences, there is one thing on which we can all agree and that is the need for the same high standard of performance and usability wherever we work and clean.

With the Numatic VersaClean range you will find a selection of designs and accessories to provide not only cleaning solutions but well thought out cleaning solutions that work and work well.

**VersaClean ...
Solutions that Work**

VersaClean... Always Thinking Ahead

The VersaClean range is designed to accept different operating systems to meet the individual requirements in different countries and applications. These systems fall mainly into 3 parts:-

1. Vertical press systems. 2. Wide press systems. 3. MopMatic system.

AllMops Vertical Press

Based on our original, time-tested, and much respected design the new All-Mops press is yet a further advance in both convenience and performance. The ability to use this press with our full range of mops, both Kentucky and Flat mops, has the obvious user advantages but, equally, by virtue of our patented collector/diverter the press can be used together with the full range of our Mopping Systems including the unique AWS - Automatic Water Separation - incorporated on the TwinMop Designs.

Speedclean Wide Press

The SpeedClean wide press embodies much of the engineering standards of the vertical press but is designed to be used exclusively with our Flat Mopping Systems.

By virtue of the unique power press operational concept this is just about the most convenient

and effective wide press design available, and can be used with our full range of Pocket or Velcro backed mop heads.

MopMatic System

A unique and thoroughly practical system providing pre-prepared mop heads to any individual standard that can be carried on the full range of VersaCare units; ensuring a well disciplined standard of floor cleaning and disinfecting in many of the people sensitive areas: completely dispensing with the traditional press and bucket requirement.

Mop Selection

With the many advances in mopping systems there have been numerous meaningful improvements in mop designs.

Different countries, different climates and different techniques have demanded a wide selection of concepts, designed to satisfy the many varied professional requirements.

Full consideration must be given to the choice of mop system based on the choice of press system - as both press and mop have been designed to be fully complimentary.

Mop Kits

The selection of the appropriate mop kit, once again, needs care so as to ensure that it is fully compatible with the operator's requirements and expectations. There are a series of variations to each primary mop design, covering basic and comfort grip and telescopic and comfort grip models.

Often the selection will be based on how extensively the mop will be used and the size of areas that will need to be covered by the user in any normal working cycle.

Different kits are designed to work with the alternative press models and must be selected with this clearly in mind.

Standard Mop Selection

Over the years substantial advances have been made in fabric composition and efficiency of individual mop heads and, once again, specific requirements must be taken into account in the selection of the appropriate specification for the floor areas to be maintained.

In principle the long established Kentucky mop provides substantial water-holding capacity, allowing floors to be washed and virtually dried and is still favoured in many warmer climates. The Loop Flat mop provides all the convenience of flat mopping with a moderate water-holding capacity.

The NyloStripe Microfibre mop represents the best of all worlds with good water-holding capacity and excellent cleaning performance by virtue of the active nylon cleaning bar design, allowing floors to be cleaned quicker, with less liquid, thus providing a shorter drying time.

Think carefully about the specific application, the level of soiling and the frequency of maintenance and select the appropriate mop head to give you both the best and the quickest results.

Mop Care

Kentucky Mops

The Monsoon range of mop heads may be washed between 60° C and 90° C but the use of bleach should be avoided as this will damage the structure of the fibre and reduce performance.

Mops that have been used exclusively for disinfecting by total immersion must be neutralized during a clean water economy wash cycle prior to any detergent wash being undertaken. This prevents interaction between the disinfectant and detergent.

Slalom Loop Mops (all styles)

All Slalom Loop mops should be pre-washed at 90° C. Pocket and Hang On types can also be maintained using a 90° C programme. Velcro Loop mops should be maintained at 75° C maximum to extend the life of the Velcro backs. Mops that have been used exclusively for disinfecting by total immersion must be

neutralized during a clean water economy wash cycle prior to any detergent wash being undertaken. This prevents interaction between the disinfectant and detergent. The use of bleach or bleach agents is not recommended as it will damage the fibres and reduce performance.

Slalom Microfibre Mops (all styles)

All Microfibre mops should be pre-washed once at 90° C and maintained by washing at 90° C. Velcro Loop mops should be maintained at 75° C maximum to extend the life of the Velcro backs. Do not use fabric conditioners, softeners, bleach or bleach agents as these will rapidly damage the microfibrils, which are the very basis of the mop design, and reduce performance and the very dirt retention characteristics.

IMPORTANT

Failure to follow a good code of mop maintenance could dramatically reduce both mop life and its very cleaning performance.

MopMatic

The unique mop preparation system...

1 MopMatic

This is really where simplicity, innovation and good practice meet and produce results.

MopMatic is designed to provide a practical answer to the disciplined maintenance of floors in people sensitive or critical areas where standards are all important.

MopMatic is a unique mop preparation system that allows operators to have an almost constant supply of clean, uniformly impregnated mops to carry out the task in hand. Whether the need is for cleaning or disinfecting or a combination of the two, uniformly prepared mops leave nothing to chance.

2 MopMatic Explained

The MopMatic mop box is totally unique (patent applied for) allowing for 10 loop or microfibre mops to be uniformly impregnated by the simple addition of the approved cleaning/disinfecting solution.

1 Load the mop box with 10 clean mop heads...

2 Pour the approved solution into the central automatic dispensing reservoir...

3 Snap on lid and leave for 15 minutes...

...then turn over and leave for another 15 minutes...

4

Remove lid, take one mop head and attach to mop, replace lid...

Red bucket can hold approximately 20-25 dirty mops with or without net insert.

5

After use place dirty mops in red bucket and replace lid

3 Choose Your MopMatic Mop System

The MopMatic system is ideally suited for use with our range of 40cm flat mops (see page 6). All you have to decide is which one suits your needs best...

2 Mop Holders

A Velcro attachment or Pocket type... a question of preference (see page 6).

2 Mop Specifications

Both Microfibre and Loop mops are available in both Velcro and Pocket styles.

NuSpray

The NuSpray with its own reservoir on-board allows for additional cleaning solution to be delivered to the floor at will, in order to maintain the cleaning efficiency at all times. Available in both Velcro and Pocket styles.

4 MopMatic Fits All...

The MopMatic system is a genuine advance in improving cleaning standards but, by virtue of its simplicity and consistency, it will find great favour with all those responsible for the supervision of, and improvement of, cleaning performance.

Operators like it because it is so simple, administrators like it because it works and works well... each and every time. MopMatic really is the cleaner way forward.

Xtra Systems

***VersaCare...
Adds Common
Sense to Planning***

In the planning stage of any comprehensive cleaning programme there will be the need for a full range of dedicated equipment designed to fulfil the primary needs of the application.

As a result of many years of experience, however, we have found that inevitably there is an important secondary range of requirements that must be addressed in order to satisfy the total needs of the overall plan and to ensure its functional effectiveness. The collection and movement of waste; the handling of linen; the service of small (and sometimes remote) areas; all need to be entered into the equation and, when given the correct consideration at the onset, they will provide those finishing touches which are always needed to ensure operational success.

Xtra Compact XC1

Half Tray with Rack and 6-litre Pails (XC1)

Universal Dual Waste System 120-litre or 2 x 70-litre -All

Optional Bactiguard Twistmop 200g XC1

Full Tray with Dividers XC3

Castors with Non-Marking, Rotating Buffers

The ideal choice of service trolley where space is at a premium but where the need for limited mopping facilities is essential.

The construction is based on our uniquely strong Structofoam chassis, fitted with non-marking 75mm (3") castors, rotating buffers, Nutex epoxy coated superstructure, two deep tray units, a pair of 6-litre colour-coded pails and a full size deep 18-litre mop pail fitted with 200g basket to suit the majority of standard mops of this size. The Bactiguard Twistmop with its anti-bactericidal specification will be much appreciated in use.

The XC-1 is fitted with a full size Universal Dual Waste System to allow a choice of 120-litre (that accepts 700 x 1100mm waste bags) or twin 70-litre waste units (that accepts 575mm/1000mm waste bags), allowing for simple onboard waste separation.

Model	Top Tray	Small Pails	Mid Tray	Large Pail	Castors	Waste Bags	Size
XC1	10L	2 x 6L	10L	18L	4 x 75mm	120L/ 2 x 70L	840 x 570 x 1060mm

XC3

Where mopping facilities are not required, this compact trolley provides maximum storage capacity - allowing for the efficient servicing of offices and other accommodations.

The construction is based on our uniquely strong Structofoam chassis fitted with non-marking 75mm (3") castors, protective buffers, Nutex epoxy coated superstructure, two full size deep tray units and a pair of 10-litre colour-coded pails.

The XC-3 is fitted with a full size Universal Dual Waste System to allow a choice of 120-litre (that accepts 700 x 1100mm waste bags) or twin 70-litre waste units (that accepts 575mm/1000mm waste bags), allowing for simple onboard waste separation.

Model	Top Tray	Small Pails	Mid Tray	Castors	Waste Bags	Size
XC3	16L	2 x 10L	16L	4 x 75mm	120L/ 2 x 70L	840 x 570 x 1060mm

Swingtop STC1 Carousel NC1

The Swingtop Carousel is, without doubt, not only an outstanding mobile cleaning module but also a very clever design providing a number of cleaning facilities in one exceptionally compact and easy to handle, user friendly, package.

In principle the Carousel range is designed to make compact size its first consideration but, whilst being small, it has ample scope for professional use. Sometimes two or three smaller units are more

acceptable than something larger.

The swing top model allows waste disposal, mopping and access to cleaning material all simultaneously. The optional Bactiguard Twist mop with its anti-bactericidal specification will be much appreciated.

Truly the Cleaners' Friend...

Fully Colour-Coded System

Easy Caddy Location

Large 75mm Non-Marking Castors

Carousel NC2

The NC-2 is pure 100% compact convenience.

Two colour-coded 70-litre lidded waste bins can be used with or without liner bags, mounted on the unique Carousel chassis for easy movement. Wet and dry waste in kitchens, etc, waste separation in offices - 101 applications.

Waste bins are detachable for easy emptying.

Model	Waste Bin	Waste Bags	Castors	Size
NC2	2 x 70L	70L	4 x 75mm	540 x 480 x 870mm

Carousel NC3

Where onboard mop systems are not required, the NC-3 is the classic helper for busy people in busy, high profile environments - yes everything to do the job in hand. A 70-litre lidded waste bin can be used with or without liner bags, plus two colour-coded detachable cleaning caddies - one large and one small - ensures that all your cleaning needs are onboard and available at all times. A real timesaver and so very convenient to use.

NC3	70L	70L	4L	10L	4 x 75mm	540 x 480 x 870mm

Carousel NC4

The full colour-coded cleaning mobile that really does allow "full" control of the cleaning programme in all applications.

Hotels, for example - bedrooms one colour, bathrooms another colour, WCs yet another... a place for everything and everything in its place. Two large and two small twin compartment caddies all together but all easily detachable as required. No system could be simpler or more versatile than the Carousel.

Model	Caddy Small	Caddy Big	Castors	Size
NC4	2 x 4L	2 x 10L	4 x 75mm	540 x 500 x 870mm

NuSax

There are areas that need static waste units - where the individual disposal of waste is convenient, and where separation of waste is an important consideration, colour-coded systems can be used to ensure a disciplined waste policy.

Model	Waste Bags	Size
Sax-120	120L/ 2 x 70L	950 x 590 x 1055mm

In the larger establishments it may not be practical to have a multitude of individual waste units and mobile waste collection is the obvious solution. This is particularly noticeable in some of the large office complexes.

The larger NuSax models are available in 2 (240-litre); 3 (260-litre) or 4 (280-litre) bag variants and, in addition, incorporate two spacious end storage tray units to accommodate "onboard" cleaning materials, permitting basic cleaning duties to be achieved simultaneously with waste collection. It all saves time and improves standards.

Colour-Coded Drawstring System

Colour-Coded Lid Disk System

Poly Bag Liner Option

Photographs include extra items for illustration purposes only.

Throughout the world there is an increasing emphasis on the care and wellbeing of both the sick and the elderly, resulting in an increasing demand for a sound, yet practical, system of linen collection, movement, and processing.

The heart of the linen mobile is a central twin bag module (LLM-2100) constructed upon a Structofoam chassis fitted with non-marking heavy duty castors.

By additional kits the 2 bag unit can be extended to 3 bags (LLM-3100) or 4 bags (LLM-4100) or by the addition of optional accessories, the 2 bag or 3 bag modules can be enhanced to provide additional facilities (pic 1 & 2).

All linen bags are fully washable and, by virtue of a choice of 4 drawstrings, can be colour coded to coincide with specific system requirements. All lids can also be colour coded to suit the bag drawstring system in blue, red, green or yellow (pic 3 & 4).

The lid and bag holder design allows a full choice to suit a variety of applications and an important facility is the added provision for using 700mm/1100mm poly liner bags within the cloth bags as and when required or, indeed, poly bags without the cloth bags if so required (pic 5).

An important added feature provides for bag extensions to fold for more compact storage, always a high priority.

Model	Waste Bags	Castors	Size
LLM-2100	2 x 100L	4 x 100mm	1100 x 580 x 1480mm
LLM-3100	3 x 100L	4 x 100mm	1510 x 580 x 1480mm
LLM-4100	4 x 100L	4 x 100mm	1910 x 580 x 1480mm

The new LL (Lidded Linen) units are also available for the NuSax and NuKeeper models.

Numatic

VersaCare Systems

The servicing of guest accommodation in hotels, residents in homes for the elderly, or patients in hospitals, clinics or sanatoria is absolutely fundamental and needs to be given full consideration at all levels in order to ensure efficient and orderly care, control and appearance.

Over the past 25 years, however, we have found that whatever you may think, there is almost no such thing as a standard specification for a housekeeping module that will suit all the different requirements.

To provide the housekeeping fraternity with a choice and variety of service units, the full NuKeeper range - together with Servo X and NuBag systems - addresses a wide range of specifications and sizes that will allow the selection of equipment that will meet the needs of the vast majority of applications, without compromise.

***NuKeeper...
the Housekeepers' Friend***

Servo-X Systems

Big in use, small in storage, the Servo-X trolley range will always find favour in the many locations where space is at an absolute premium.

All Servo-X trolleys can be easily folded for storage and the laundry bags themselves can be removed, incorporating drag handles and our top closure system. *

Servo-X uses all the same bag sizes as Servo-Keeper and Servo-Bag units, providing total uniformity and allowing a fully integrated and co-ordinated professional approach to system planning.

NuKeeper Flexi Front NKS - single

The NuKeeper single NKS model has been specifically designed for the smaller facilities, yet incorporates all of the highly respected professional features for which all NuKeepers are renowned.

The complete design is based on our Hi-mobility AT chassis, incorporating heavy duty 200mm soft ride castors and all round bump protection. There is a choice of two styles, either the Flexi system or our classic single door cabinet design.

NuKeeper Flexi Front NKL - low

Each and every NuKeeper application has its own needs and requirements. The NuKeeper NKL models incorporate all of the professional design features of the NuKeeper range but are sized to suit small to medium sized establishments.

The NKL series are all based on our Hi-mobility AT chassis, incorporating 200mm soft ride castors and all round bump protection. There is a choice between the innovative Flexi Front with hideaway front cover and our Hard Front cabinet design. Both designs are available in 3 variations in order to provide additional laundry bag facilities.
